

iGrafx® PROCESS CENTRAL²⁰⁰⁹

The Central Hub for all Process Improvement Initiatives

iGrafx Process Central is ideal for organizations engaged in:

- Six Sigma
- Lean
- BPM Initiatives
- Sarbanes-Oxley Compliance
- ISO Registration
- BASEL II Compliance
- Business Process Improvement
- Total Quality Management

iGrafx® Process Central® is a server software solution that helps organizations be more productive and efficient in developing, documenting and communicating business process improvements. Through its central repository, Process Central stores, manages and distributes all process initiative information. iGrafx Process Central works with the entire iGrafx family of process excellence client solutions.

Key Feature	Benefit
Central Storage and Access Control	Maintain and manage process models in a central repository. Data is widely accessible but secure.
Versioning and Audit Trail	Ensure accurate document history and roll-back capability.
Shared Resource Model	Reuse organization elements across multiple models. Build consistent models and speed development.
Lifecycle Management	Models progress through multiple stages of maturity from review, to approval, and sign-off.
Link Management	Groups work more effectively when document links are automatically maintained.
Store non-iGrafx Documents	Manage supporting process documentation, such as Microsoft® Office files, in the iGrafx repository.
Web Access Without Publishing	Eliminate intermediate web documents to reduce publishing errors and web updates.
Define and Scope Projects	Identify progress towards process goals. Associate models to Six Sigma projects.
NEW Process Architecture Navigation	For customers utilizing Enterprise Modeler, end users may navigate a defined enterprise process architecture.
Search and Query	Find information fast and customize queries to display relevant data.
Subscriptions	Monitor work in progress and obtain e-mail notifications when documents are modified.
NEW Configurable Look and Feel	Modern graphic design options may be used to configure the look and feel of Web Central's landing and content pages.
Standards Based	Uses Microsoft® SQL Server™ or Oracle®.

Bridging the Gaps to Process Excellence

Bridging the organizational boundaries between IT, business analysts, and process initiative groups is a key requirement of any organization that wants meaningful process improvement. Additionally, companies need tools specifically designed to meet the unique requirements of initiatives such as Six Sigma, BPM and ISO. Finally, large companies that want to maximize their process improvement efforts should also deploy centralized management systems like iGrafx Process Central to facilitate organization wide collaboration, communication and decision making.

Raise Process Improvement Above Organizational Silos

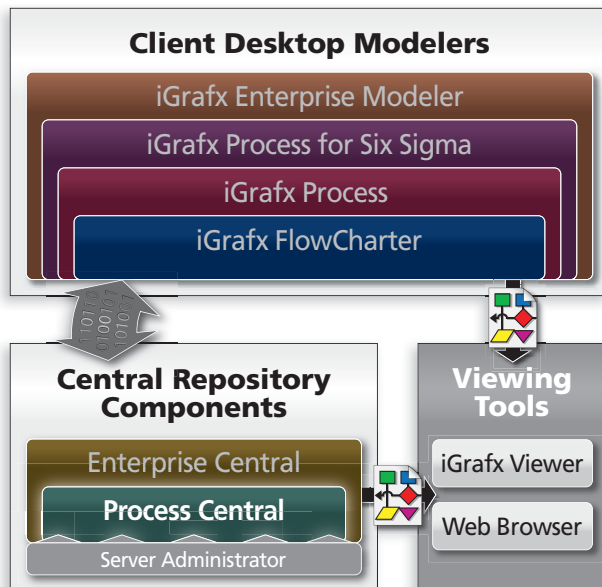

iGrafx Process Central helps organizations bridge departmental silos through central management and distribution of all process knowledge, including process maps,

analysis reports, spread sheets and related documents.

iGrafx Process Central goes beyond traditional document management in providing a repository specifically for process improvement efforts. Along with the authoring products of the iGrafx family, iGrafx Process Central controls access at numerous levels, manages versions, enables rollback, provides an audit trail and ensures document review and approvals by authorized users. Plus, all of the process knowledge that is managed in the central repository can be communicated to anyone with the right access privileges through a Web browser.

All of this power and control is tightly integrated with the legendary ease of use found in the entire family of iGrafx solutions for a unified approach to process improvement.

iGrafx is an integrated suite of software and services for process excellence.
